Semi-automatic packer Ergosa D

« A PATENTED AND UNIQUE SYSTEM FOR THE PACKING OF SMALL BOXES (MINIS). »

The semi-automatic packers of the Ergosa family bring the best of both worlds. With the Ergosa packers you get the flexibility of a semi-automatic packer and the performances of an automatic packer. They also allow access to the individual boxes for quality control and checks required in today's market.

The "D" model of the Ergosa family is equipped with a patented multi-level™ system. This multi-level™ systems allows for the packing of small (mini) boxes by sliding them onto in internal elevated plate inside the case, that indexes down for every layer allowing for fast packing operations with only one packing person. The Ergosa D is the favorite solution of our pharmaceutical, cosmetic and beauty clients. In addition to the multi-level™ system, the Ergosa D offers all of the features and flexibility of the Ergosa C.

A few options available with the Ergosa D :

- Special attachment for packing into trays;
- Back side auxiliary packing station for a second packer when packing auto crash and lock bottoms.
- MIC™ control of the gluer from the packing station.
